Fleet

### Designed with you in mind

SmartMail2 delivers driver safety and protection information to you within seconds of an incident taking place. That may be a road collision, an unsafe speeding event or when someone wants to know you're looking out for them.

Using the latest 3G/4G technology a panic button press or G-Force trigger will automatically send an email notification to whoever needs to know.

### Instant video evidence

Emails contain GPS position and a 10 second video file of what is going on around the vehicle - and it's delivered in seconds. If you see something you don't like and need a greater level of information, no problem, just request it from the camera and it'll be right with you. The encrypted video file can be viewed using our SmartAnalysis software or simply downloaded from the website.

### The power to back up your claim

With access to real-time and historical GPS position you can substantiate any claim - seeing exactly what happened, where it happened and how it happened. If there's a lesson to be learned there's no simpler, faster or better way to help educate your team.

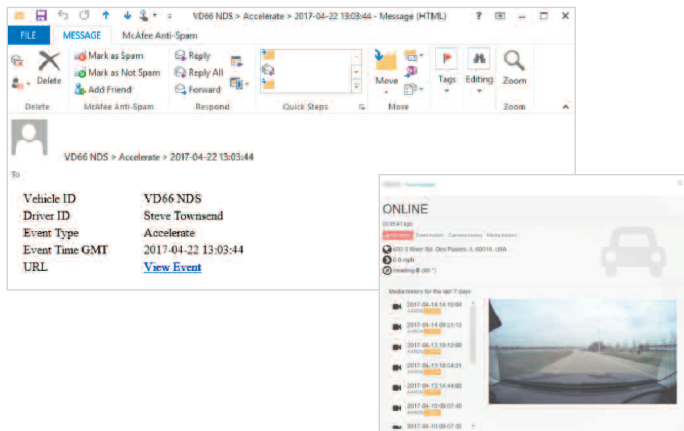

The benefits don't end there! Industry statistics show that the faster any claim can be picked up and managed by your Insurer (whether you are at fault or not) the cheaper the claim is to resolve. The lower the claim cost the less impact it has on your insurance renewal/loss ration. **It really is a win/win.**

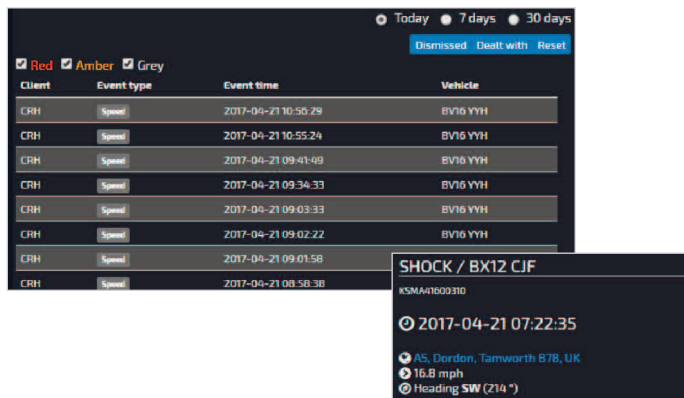

# ed to your inbox

# Features/Benefits

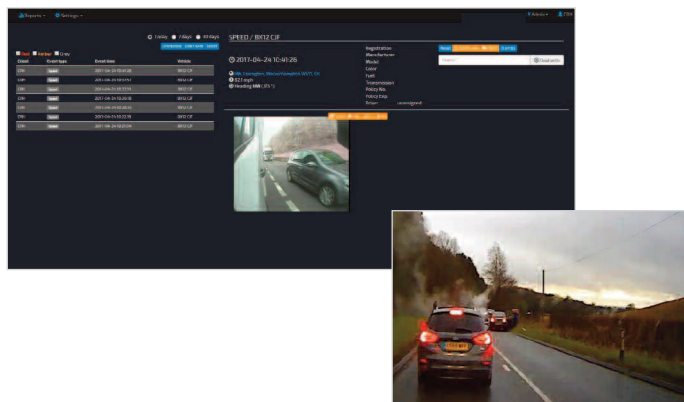

## Headline Email/Footage Review

## See Who, When and Where

## See How

### Features:

- Review from the last 30 days
- Dismiss/action triggers
- 10 second low cost quality snapshot images
- Download MP4 video remotely
- One-click video footage review
- Audit trail of incident management and actions
- See where a vehicle is and what caused the trigger

### Benefits:

- Notifications to your inbox
- Easy to use
- Simple to administer
- Easily manage alerting
- Top quality video with high compression reduces comms costs
- Protecting insurance premiums with FNOL
- Improve risk management and road safety

# Why SmartWitness?

SmartWitness are a world-leading designer, manufacturer and supplier of in-vehicle cameras, recorders and safety systems.

## 2007

The year we started providing in-vehicle cameras to fleet operators and commercial vehicle owners.

## 250K

The amount of vehicles around the world benefitting from SmartWitness protection.

## 35M

The amount of miles driven every day under the watchful eye of SmartWitness solutions.

## 10Y

The amount of time we have spent to date on R&D. We're constantly developing new products and technologies.

### HD Evidence Captured

High-definition cameras capture crystal-clear images of inside/outside of the vehicle.

### GPS Location Recorded

Built-in GPS/Glonass provides precise event location, route, vehicle speed & direction.

### 3G/4G Connected

Cellular connectivity provides real-time images, live location, and on-demand HD video upload.

### Event Analysis

Powerful software is included with every system to review, analyse and backup video on your PC.

## SmartWitness Awards & Accreditations

Today, SmartWitness is further bridging the gap between vehicle telematics and video with its lineup of network connected products and accompanying API stack.
